nceta@flinders.edu.au

Lunch will follow the resource launch

The National Centre for Education and Training on Addiction (NCETA)
is pleased to announce the launch of its latest resource
to support prescribers who have patients
with pharmaceutical opioid-related problems.

This brief resource has been tailored to help clinicians respond to the:

- increasing harms stemming from pharmaceutical opioid use
- challenges experienced by prescribers when responding to patient needs.

Copies will be available after the launch in hard print, on USB, or from
www.nceta.flinders.edu.au.
