

MANAGING DRUG & ALCOHOL RISK TO SAFETY & WORKER WELLBEING

The National Centre for Education and Training on Addiction (NCETA) is conducting a three year (2018-20) project to strengthen organisational, employer, and employee responses to alcohol and other drug related risks in the workplace.

ABOUT US

NCETA is Australia's peak national research centre concerning workplace alcohol & drug issues.

NCETA has a long track record of workplace alcohol & drug related research, training & consultation.

NCETA has worked with a wide range of individual employers, employer & employee organisations, government agencies, occupational health & safety authorities, & worker health & compensation agencies.

This project is funded by the Drug and Alcohol Services of South Australia (DASSA).

DASSA is a part of SA Health. It is a statewide health service that offers prevention, treatment & education services for all South Australians.

RESOURCES

In collaboration with industry and workplace stakeholders, NCETA will develop tailored tools and techniques to help employers and employees manage harmful alcohol and drug related risks in the workplace.

Resources will include:

- How to assess and control alcohol and drug risks
- Practical workplace responses to reduce alcohol and drug harms
- Information on employer/employee legislative responsibilities
- A model alcohol and drug workplace policy
- Online training modules.

WORKFORCE TARGET GROUPS

- Tradespersons/blue collar workers
- Males aged 20-35 years
- Regional/Rural workers
- Construction, mining, hospitality, and transport/wholesale employees.
